General-Chair
Antonia Bertolino, ISTI-CNR, Italy

Program Co-Chairs
Gerardo Canfora, University of Sannio, Italy
Sebastian Elbaum, University of Nebraska – Lincoln, USA

Program Committee
Jonathan Aldrich, Carnegie Mellon University, USA
Giulio Antoniol, Ecole Polytechnique de Montreal, Canada
Sven Apel, University of Passau, Germany
Benoit Baudry, INRIA, France
Andrew Begel, Microsoft Research, USA
Victor Braberman, University of Buenos Aires, Argentina
Lionel Briand, University of Luxembourg, Luxembourg
Yuriy Brun, University of Massachusetts, USA
Tevfik Bultan, University of California Santa Barbara, USA
Cristian Cadar, Imperial College London, United Kingdom
James Clause, University of Delaware, USA
Myra Cohen, University of Nebraska - Lincoln, USA
Andrea De Lucia, University of Salerno, Italy
Elisabetta Di Nitto, Politecnico di Milano, Italy
Schahram Dustdar, Vienna University of Technology, Austria
Jeffrey Foster, University of Maryland College Park, USA
Mark Grechanik, University of Illinois at Chicago, USA
John Grundy, Swinburne University of Technology, Australia
Lars Grunske, University of Stuttgart, Germany
John Hatcliff, Kansas State University, USA
Felienne Hermans, Delft University of Technology, Netherlands
Patrick Heymans, University of Namur, Belgium
Reid Holmes, University of Waterloo, Canada
Miryung Kim, University of Texas at Austin, USA
Moonzoo Kim, KAIST, South Korea
Akash Lal, Microsoft Research, India
David Lo, Singapore Management University, Singapore
Sam Malek, George Mason University, USA
Andrian Marcus, Wayne State University, USA
Leonardo Mariani, University of Milano Bicocca, Italy
Stephen McCamant, University of Minnesota, USA
Oscar Nierstrasz, University of Bern, Switzerland
Patrizio Pelliccione, Chalmers University of Technology and
            University of Gothenburg, Sweden
Suzette Person, NASA, USA
Denys Poshyvanyk, The College of William and Mary, USA
Steve Reiss, Brown University, USA
Romain Robbes, University of Chile, Chile
Martin Robillard, McGill University, Canada
Caitlin Sadowski, Google, USA
Yannis Smaragdakis, University of Athens, Greece
Giancarlo Succi, Free University of Bolzano, Italy
Paolo Tonella, FBK - Fondazione Bruno Kessler, Italy
André van der Hoek, University of California Irvine, USA
Willem Visser, Stellenbosch University, South Africa
Westley Weimer, University of Virginia, USA
Laurie Williams, North Carolina State University, USA
Tao Xie, University of Illinois at Urbana-Champaign, USA
Andreas Zeller, Saarland University, Germany

Reviewing Committee

James Andrews, Google Inc., USA
Licia Capra, University College of London, United Kingdom
W. K. Chan, City University of Hong Kong, Hong Kong
Jane Cleland-Huang, De Paul University, USA
Jin Dong Son, National University of Singapore, Singapore
Brian Fitzgerald, University of Limerick and LERO, Ireland
Robert France, Colorado State University, USA
Diego Garbervetsky, University of Buenos Aires, Argentina
Jeff Gray, University of Alabama, USA
Alex Groce, Oregon State University, USA
Guilherme Horta Travassos, COPPE and UFRJ, Brazil
Maletic Jonathan, Kent State University, USA
Rainer Koschke, University of Bremen, Germany
Yvan Labiche, Carleton University, Canada
Filippo Lanubile, University of Bari, Italy
Benjamin Livshits, Microsoft Research, USA
Robyn Lutz, Iowa State University, USA
Michael Lyu, Chinese University of Hong Kong, Hong Kong
Shahar Maoz, Tel Aviv University, Israel
Phil McMinn, University of Sheffield, United Kingdom
Hong Mei, Peking Univesity, China
Mira Mezini, Technische Universität Darmstadt, Germany
Martin Monperrus, University of Lille, France
Martin Pinzger, University of Klagenfurt, Austria
Andrea Polini, ISTI-CNR, Italy
Anita Sarma, University of Nebraska, Lincoln, USA
Carolyn Seaman, University of Maryland Baltimore County, USA
Saurabh Sinha, IBM Research, India
Kathryn Stolee, Iowa State University, USA
Massimo Tivoli, Università degli Studi dell'Aquila, Italy
Emina Torlak, University of California, Berkeley, USA
Shin Yoo, University College London, United Kingdom
Andrea Zisman, The Open University, United Kingdom

ICSE 2015

Call for Technical Research Papers

Submission:	September 5th, 2014
Notification:	December 20th, 2014
	Early phase rejection notice by Nov. 15th, 2014
	(only for non-PC and non-RC members)
Camera ready:	February 13th, 2015

We invite high quality submissions of technical research papers describing original and unpublished results addressing topics across the full spectrum of software engineering research. A list of topics can be found at:

http://2015.icse-conferences.org/technical-research-topics.

Submission instructions

Submissions must conform to the ICSE 2015 format and submission instructions. Papers must not exceed 12 pages, 10 pages for the main text, including figures, tables, appendices, etc, and up to 2 pages for references. As part of the online submission process, we ask authors to self-identify: i) conflicts of interest with members of the PC and the RC committees (according to the COI rules at http://www.sigsoft.org/about/policies/pc-policy.htm);   and   ii) submissions with one or more of the following categories: Analytical, Empirical, Methodological, Perspectives, and Technological. For instructions about submissions please visit: http://2015.icse-conferences.org/technical-research-submission.

Submission Evaluation Process

Each submission will be reviewed by the Program Co-Chairs to ensure compliance with the required submission format, compliance rules, and scope. Submissions that do not meet these criteria will be rejected. Submissions that meet the criteria of the conference will be reviewed and evaluated on the basis of originality, evaluation, soundness, importance of contribution, quality of presentation, and appropriate comparison to related work.

New to ICSE 2015. To scale to the increasing number of ICSE submissions, to enable broader community participation, and to have access to additional reviewing expertise, ICSE 2015 will tap into the expertise of two committees working in tandem: a Program Committee (PC) and a Reviewing Committee (RC). The reviewing process will consist of two phases. In the first phase, PC and RC members will help to provide two reviews per submission. Submissions with at least one supportive review will advance to the second phase where they will receive a third review by a PC member. This will be followed by an on-line discussion to clarify reviewers' positions, assignment of an additional reviewer if necessary, and a physical meeting with PC members to decide the final list of accepted papers. More details about the reviewing process can be found at http://2015.icse-conferences.org/technical-research-faq.
